

Laser Therapy Return on Investment Worksheet

Use this worksheet to identify potential laser therapy revenue for your practice

➔ How to Use the Worksheet:

Pain and Mobility Patients:

Write in the number of patients you see in your practice per week with these conditions. Standard laser therapy protocols suggest a series of six treatments with an average treatment cost about \$25.

Surgeries and Dental Procedures:

Write in the number of patients you see in your practice per week that receive any type of surgery or dental procedure (excluding orthopedic surgeries). We recommend including at least one laser therapy treatment into the surgery cost. Average cost per post-surgery is \$10

Orthopedic Surgeries:

Write in the number of patients you see per week in your practice with that receive any type of orthopedic surgery Standard laser therapy protocols suggest a series of six treatments with an average treatment cost about \$25.

Other MLS® Treatable Conditions:

Write in the number of patients you see per week in your practice with acute or chronic conditions including wounds, anal sacculitis, edema, lick granulomas etc. Standard laser therapy protocols suggest a series of six treatments with an average treatment cost about \$25.

Post-surgical application of laser therapy will help reduce inflammation & swelling and improve post-op chances at success.

Pro Tip!

Be sure to check out our MLS Indications List for a complete list of conditions that laser therapy is clinically proven to treat.
